

A home is the biggest single investment that most people make in their lifetime. One can spend anywhere from \$50,000 to several hundred thousand dollars.

One of the most important aspects of a functioning home is to have water, from a spring, a drilled well or a municipal system.

At Gould Well Drilling, we try to meet our customer's needs when we drill and design a workable water system. Today's homes are larger with more options which require more water.

As a company, we are not interested in doing a job cheaply. We try to work with the homeowner or contractor to provide a quality system. A home water system is no place for second best. We want to do the job right the first time.

Customers need to think of their water system as a long term investment which raises the value and comfort of their home, and improves their quality of life, not as an up front cost.

There are costs associated with convenience. We have the ability to offer our customers options which can meet standard needs and we can offer them "upgrade" options which can range from constant water pressure to forms of water treatment.

It is unfortunate, but there is no way that we can promise you quantity or quality of water. What we strive to do is help the homeowner to work with what they have been given.

Our average system is based on a 250-foot well; current rates make this size system cost roughly \$8,000.

Most systems last longer than the following example but the time frame is easy to work with.

Here is a breakdown for comparison:

**\$8000 (Cost of System) =
10 years (Estimated Life)**

- **\$800/year**
- **\$67/month**
- **\$2.22/ day**

That means \$2.22 per day for all the water that you need for laundry, bathing, cleaning and drinking.

Is it too much to pay for a reliable supply of fresh water that you need in order to live?

Typical Yearly Expenses:

Water system- \$ 800
Mortgage- \$ 9,500
Car Payments- \$ 5,000

Typical Monthly Payments:

Water System- \$ 67
Cable TV/SAT- \$ 70
Telephone- \$ 50
Electric Bill- \$100
Heat Bill- \$200

Typical Daily Spending:

Water System- \$2.22
Coffee- \$1.65
Gasoline- \$2.60

We hope that you will view our company as your local water professional that strives to meet your needs.

Our staff are trained to assess your issues and get you up and running with the system that will best suit your needs.

Please feel free to call with questions, email or visit our website.
